SUMMARY

Seeking an entry-level web developer position where I can apply my attention to detail and the knowledge I learned while earning my B.S. in CSE. I am more Quality-focused and results-driven web developer with expertise in React JS, Express JS, Node JS, and Mongo DB.

SKILL HIGHLIGHTS

Interpersonal Skills: Team work, Punctuality, Organizing, Passionate.

Front end: ES6, JavaScript, React JS, React Router DOM, HTML5, CSS3, REST API, Bootstrap, Material UI.

Back end: Node.js, Firebase, Express.js.

Database Management: MongoDB, MySQL, SQL.

Tools: VS Code, Chrome Dev Tool, GitHub, Figma, Heroku, Netlify.

Programming Language: C, C++, Java

EXPERIENCE

- Company Name: Recline IT, Uttara, Dhaka.
  Position: Junior React front-end developer (Part-time)
  Job: Update UI of an existing project as per client requirements. (From November 2021)
- Company Name: Ayesha Service link Limited, Uttara, Dhaka.
  Position: Data Analyst.
  Job: Managing client's software and processing their work orders. (April 2016 to June 2018)

PROJECTS

1. **G. Chairs** (November 2021)   Live Website | GitHub Client | GitHub Server
Overview:
- Built a Gaming Chair Selling website with separate admin and user panel.
- User can place order, check orders, delete orders, leave a dynamic review using stars.
- User's review message and star rating will show on home page review section dynamically.
- Admin can add/delete products & change order status & it will update the user's dashboard.

Technology Used: React JS, Node JS, Firebase, Express JS, Mongo DB, React Router v-6

2. **SEAKERS** (October 2021)   Live Website | GitHub Client | GitHub Server
Overview:
- A Travel Agency Website for organizing tour packages showing many packages in home page.
- User can book packages, check his individual ordered packages can confirm or delete.
- User can custom his tour packages, which will directly show on the home page.

Technology Used: React JS, Node JS, Firebase, Express JS, Mongo DB, HTML, CSS.

3. **Care & Cure** (October 2021)   Live Website | GitHub Client | GitHub Server
Overview:
- A Diagnostic Center Website with email password and google login/registration system.
- Users can book for a test, before booking user will see details about the specific test.
- More routes such as Doctor appointments, Career opportunities and about us implemented.

Technology Used: React JS, Node JS, Firebase, Express JS, Mongo DB, HTML, CSS.

EDUCATION

- BSc in CSE | North South University (2015-2020)

EXTRA CURRICULAR ACTIVITY
